

Beneficiary Entity: Tomás Castro Silva, Lda. (Rico)

Project Description: Rico i4.0 2024-2025

Project nº: 9491

Main Goal: Optimize the industry.

Approval Date: 08/03/2024

Start Date: 01/03/2024

Conclusion Date: 30/06/2025

Total Eligible Cost: 249.145,00€

Financial Support: 186.859,00€

Objectives, Activities, and Expected Results:

With this project, we aim to invest in customized programming tailored to our needs. The goal is to integrate production processes into the software, allowing the software to define requirements. By installing computers at various points across the factory floor, production inputs can be managed more effectively, minimizing errors caused by human planning failures. This initiative enables a real-time control system, a more efficient provisioning system, and improved planning accuracy, resulting in more reliable delivery dates. Additionally, it facilitates the implementation of an effective costing system.
